THE BINARY

R-EVOLUTION & RENEGADE

Bloq expands the existing RENEGADE collection with new colours and presents **R-EVOLUTION, a transitional tile** with old and new colours. This expansion, a subtle enrichment of the established collection and its colour palette, is designed to bring **the energy of natural movement** into stylish office and hospitality spaces.

These tiles are part of The Binary collection, known for its modern patterns made with light and dark colour combinations. Today, living and working environments have never been so closely connected.

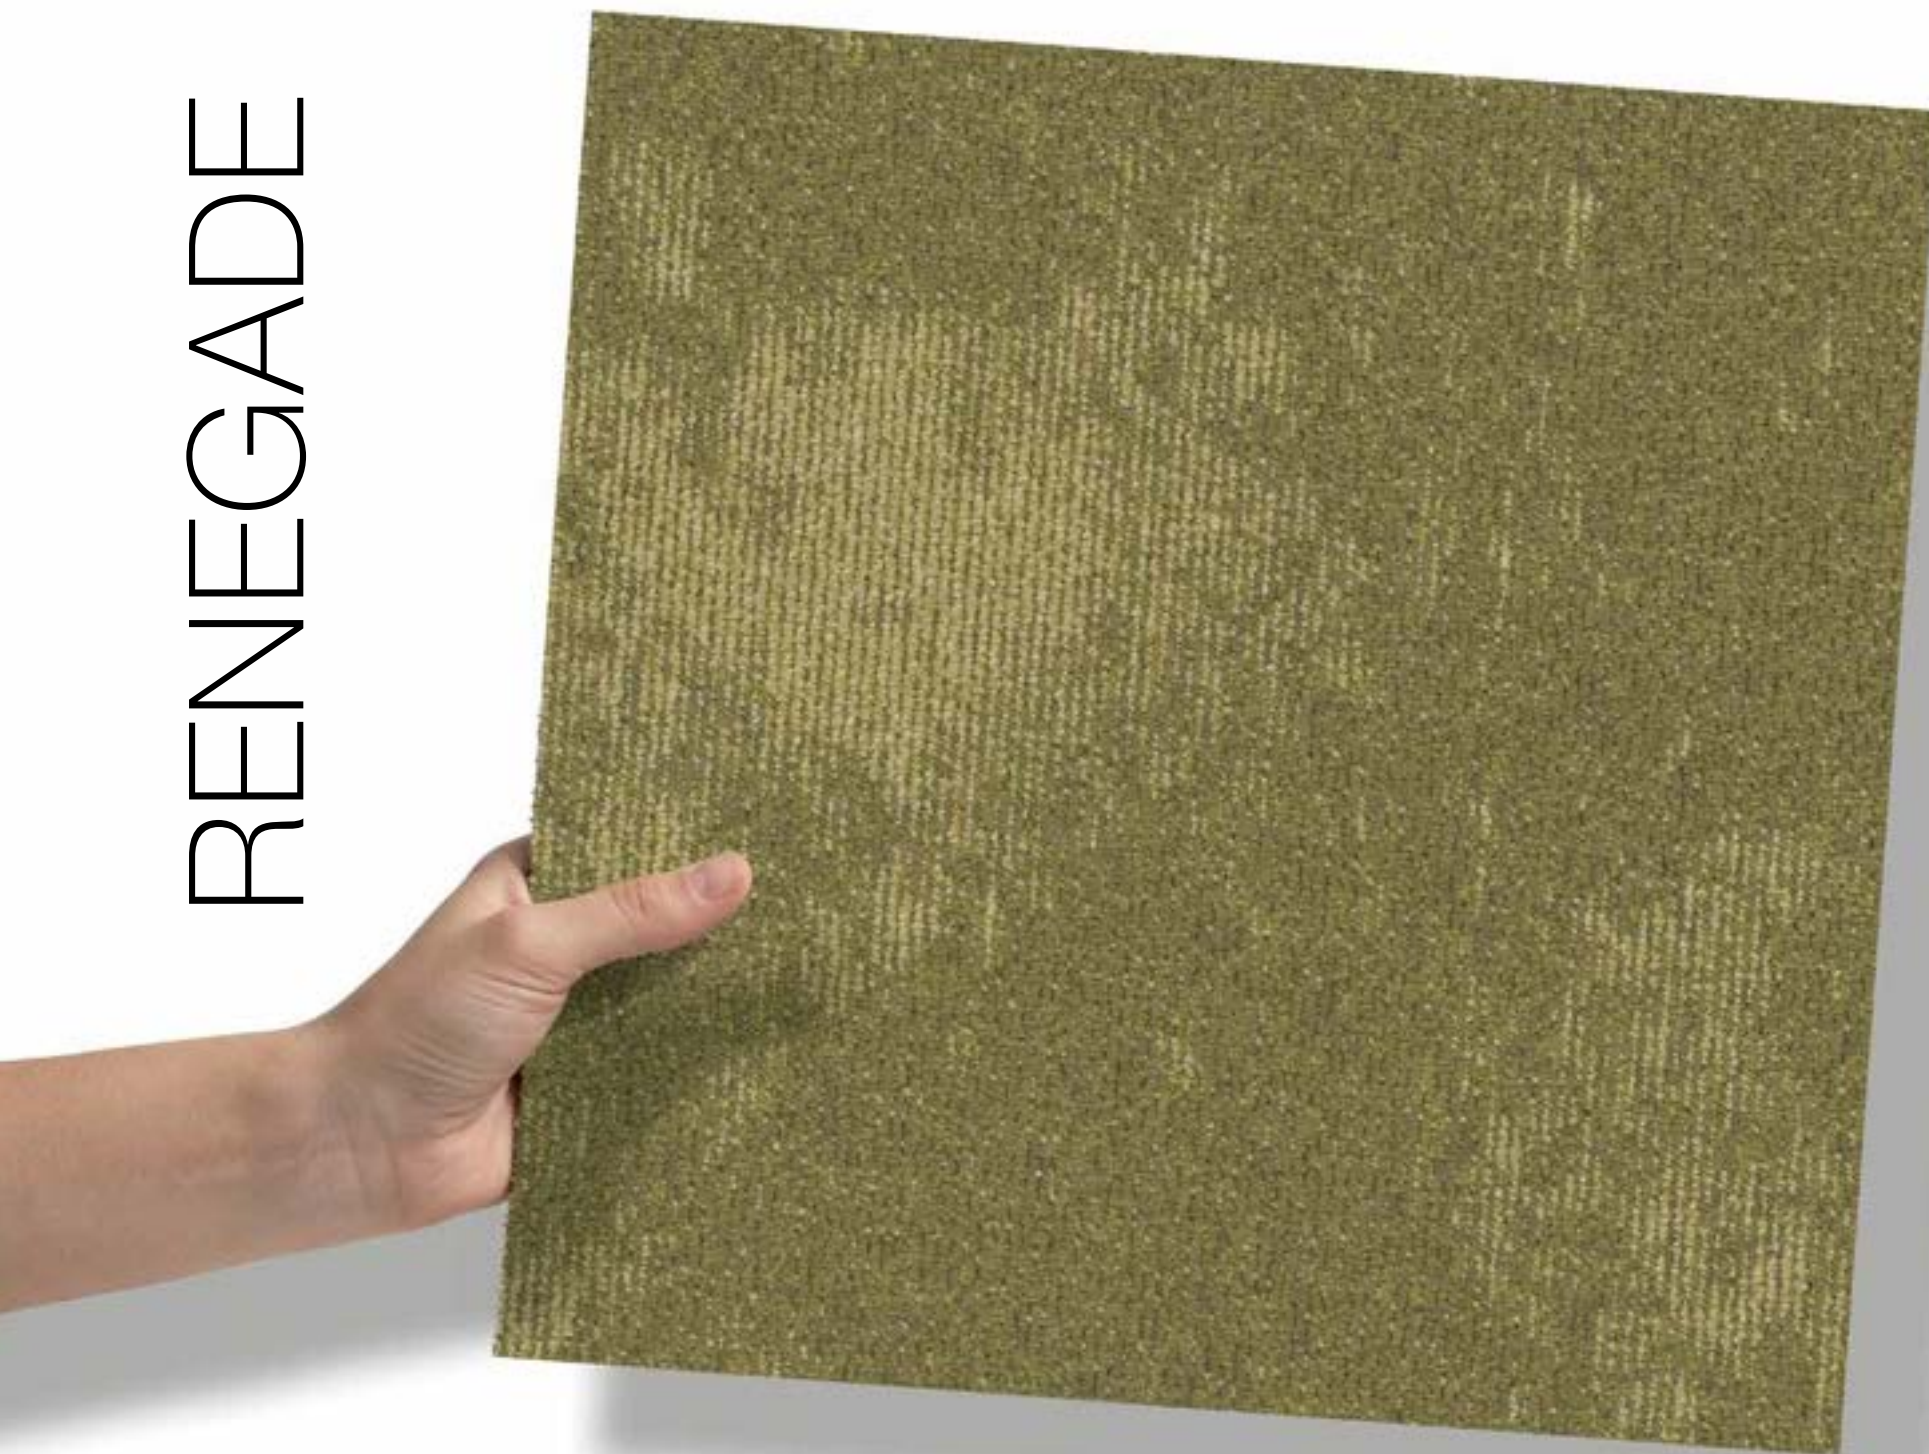

Inspiration is everywhere

motion & tranquility

Inspired by aerial views of the coastline, where waves meet sand and rhythm blends into calm. It reflects a continuous interplay of motion and tranquillity.

RENEGADE

Plain colours

RENEGADE is a 50×50 cm tile with a soft, cloud-like design that brings a sense of calm. We present new colours for this range, as well as a **curated selection chosen specifically to combine with R-EVOLUTION**. These sophisticated tones, with two gentle shades, create a dreamy, ever-unique pattern. The floor feels light, elegant and timeless, almost like walking on clouds. Also, the original Renegade colour range remains available and can be viewed on the website and in the separate RENE GADE brochure.

Transition tiles

R-EVOLUTION creates a natural transition between two colours within a space. Available in **12 gradient tones**, it brings gentle colour changes, helps define areas and adds architectural depths to the space much like tidal lines connect the sea and shore, without clear borders.

Bringing the outdoors inside

The R-EVOLUTION-RENEGADE carpet tile collection creates a natural flow between outdoor and indoor spaces. Their subtle patterns and gentle colour changes ensure **smooth, elegant transitions** across the floor. By guiding movement and gently marking different areas, the collection adds calm, cohesion, and a sense of natural balance to modern office and hospitality spaces.

Used in modern buildings and nature-inspired spaces worldwide, R-EVOLUTION proves itself as a versatile design tool for creating strong, **future-focused interiors**.

LIGHT REFLECTANCE VALUES

Light Reflectance Value (LRV) is a scale that measures visible and usable light reflected from an illuminated surface. The percentage identifies how much light a colour reflects or absorbs. 0% reflects no visible light, 100% reflects all light.

RENEGADE	LRV av	L
111	29.24	60.99
113 NEW	44.10	72.30

ECONYL® 100% REGENERATED YARNS

R-EVOLUTION is consciously crafted from ECONYL® Regenerated Yarn, a breakthrough material made from discarded fishing nets and other nylon waste. By transforming ocean pollutants into high-quality carpet fibres, we reduce our environmental footprint and protect the oceans.
